12pt

ON THE ENDS OF GOOD AND EVIL BY THE ROMAN ORATOR, POLITICIAN, AND PHILOSOPHER MARCUS TULLIUS CICERO. But I must explain to you how all this mistaken idea of denouncing of a pleasure and praising pain was born and I will give you a complete account of the system, and expound the actual teachings of the great explorer of the truth, the master-builder of human happiness. No one rejects, dislikes, or avoids pleasure itself, because it is pleasure, but because those who do not know how to pursue pleasure rationally encounter consequences that are extremely painful. Nor again is there anyone who loves or pursues or desires to obtain pain of itself, because it is pain, but occasionally circumstances occur in which toil and pain can procure him some great pleasure. To take a trivial example, which of us ever undertakes laborious physical exercise, except to obtain some advantage from it? But who has any right to find fault with a man who chooses to enjoy a pleasure that has no annoying consequences, or one who avoids a pain that produces no resultant pleasure?

La velocidad del transporte, las comunicaciones y el conocimiento no ha parado de incrementarse exponencialmente en este cambio de siglo. En El futuro va más rápido de lo que crees, Peter Diamandis y Steven Kotler ponen un ejemplo rotundo de ello. En 1997, la computadora Deep Blue de IBM derrotó al ajedrez al campeón del mundo, Gary Kaspárov; exactamente veinte años más tarde, la AlphaGo de Google ganó al campeón de go Lee Sedol. La complejidad del ajedrez es de 10 elevado a 40; la del go, de 10 elevado a 360. Una diferencia de 320 en solamente dos décadas. ¿Qué hacer? "El desequilibrio cada vez más extremo entre la velocidad del mundo y la de nuestros cerebros, entre la complejidad de la realidad y nuestra capacidad de pensarla y entenderla, está dilatando la brecha digital y está cambiando el sentido de lo que entendemos por desigualdad". Entre 2015 y 2030 vamos
